When, from a central point of view, reinforced measures have been decided, our schools and kindergartens will of course also be closed from tomorrow 13.03.20. The school management and teachers work with plans for homeschooling where appropriate. Information will be provided from current schools and kindergartens.

CARE OFFERS

Although kindergartens and schools are closed, we must maintain the business of health and care services and other critical social functions. We also want to prevent people at risk from being used for babysitting. That is why we in Gamvik municipality establish a care offer for kindergartens and small children, 1-4. class. This is for children of parents who do not have the possibility of child care and who have critical social functions. Parents in this regard will be contacted.

TRAINING

The pupils have the right to receive education, and in the municipality of Gamvik, we work to adapt our digital solutions to ensure good communication between teachers and pupils and to allow students to do school work at home.

FOR THE YOUTH

The Norwegian Prime Minister has closed the operation of schools and kindergartens. This decision is made to protect the health of the population and limit the spread of infection. Everyone must take responsibility and prevent the spread of infection, so that our request is that you do not gather in large groups. And remember good hand and cough hygiene wherever you are.

ENCOURAGING

The spread of the coronavirus is a serious situation for the entire country, and we sincerely ask that everyone respects the measures implemented by the Norwegian Institute of Public Health, the Directorate of Health and the municipal council v. Infectious doctor and councilor. We must, as far as possible, prevent anyone in our municipality from being infected or quarantined. We see that people in other countries die from the virus and we must all do what we can to protect our weakest.

In addition, the following local regulations have been made for the time being:

The sports hall, swimming pool, cinema and library are closed The town hall closes for the public, contact can be made by phone, email or facebook.

Day centers are closed.

Priority will be given to medical resources and hours may be postponed Visiting bans are introduced in nursing homes. It is encouraged that relatives can only visit in special circumstances. This must be clarified in advance. All events and gatherings in private, non-profit and corporate context should be canceled

The municipal services will be challenged and some of the ordinary operations will be discontinued. We apologize for that and apologize for any inconvenience this may have caused.

This is a very special situation with the most stringent measures in the country implemented in peacetime. We ask that everyone contribute, for example, with childcare of those who can according to the recommendations of the authorities (not those who are at risk groups), so that health professionals can meet at work as usual. This is very important for us to be able to provide sound health care to those who need it.

raveling:

The Directorate of Health wants domestic transport as normal as possible, but we strongly encourage everyone to avoid leisure travel.

We encourage you to avoid travel that is not strictly necessary (both domestically and abroad), avoid public transport if you can, avoid other places where you can easily get close to others, avoid close contact with others.

Everyone who comes from outside the Nordic countries should stay in their home quarantine for 14 days, regardless of whether they have symptoms or not. In order to stop the spread of Covid-19 and help maintain the necessary health and care services, the Directorate of Health shall, in accordance with Section 4-1, second paragraph of the Contingency Protection Act, make a decision on:

- 1. That everyone arriving in Norway after traveling outside the Nordic countries is quarantined for 14 days after arrival.
- 2. That everyone who arrives in Norway after traveling outside the Nordic countries is quarantined by symptoms such as colds, fever and / or wheezing. The isolation lasts for at least 7 days after symptom relief
